HUNT'S *Perfection* BULBS

BETTER BULBS » » AT LOW PRICES

With the issue of this Catalog our customers have the opportunity to buy *Sterling Novelties* at the price of older, standard varieties. Buyers of large quantities of bulbs for naturalizing will be quick to seize this chance to obtain higher-class varieties than are usually used for that purpose, at exceedingly attractive prices.

We have arranged to have Dutch Bulbs, ordered from us *before August 10th*, separately packed in Holland for each customer. This expedites service and avoids both damage and loss in re-handling. The bulbs will come to the purchaser in the original Holland packages.

For the continued patronage and good-will of our many friends and customers, we are grateful. Knowledge and appreciation of high-grade plants, bulbs, and seeds are steadily increasing, and it is our aim to make this firm the leader in providing for this steadily advancing horticultural interest.

Early Ordering. Your coöperation is invited. Placing orders early will facilitate delivery at proper time.

Rush Orders may be telegraphed or telephoned at our expense.

Prices of Bulbs, Seeds, Plants, and Supplies are subject to market and tariff changes.

Terms. Prices quoted are net and do not include free transportation, except for seeds in packets, ounces, or quarter-pounds, on which we pre-pay postage or express to any point in the United States.

Upon delivery of goods to the carrier, ownership passes to the purchaser; when the carrier issues a receipt our responsibility ceases. Claims for damage should be made to the transportation agent at point of delivery.

Non-Warranty. William M. Hunt & Company, Inc., give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are to be returned at once.

Extract from letter received from Mr. Eugene T. Erickson, Supt., Miss E. K. Lamont, Millbrook, N. Y.

"It is a pleasure to send to Hunt's because a speedy reply and prompt and careful shipment can be always relied upon."

HOW TO GROW BULBS

Daffodils and Crocuses may be planted in the garden between the first of September and the middle of October; Tulips the latter part of October, but should not be delayed too long if best results are desired. Early-planted bulbs come up more evenly, earlier, and develop finer flowers than those put in later. Hyacinths may be planted any time from September to December.

When grown in beds, Hyacinth and Tulip bulbs should be planted at a uniform depth. The easiest way to do this is to remove all soil from the bed to the depth required, set the bulbs as far apart as the planting-table indicates, and carefully replace the soil. Many people do not think this is worth while; they prefer to plant with a trowel or dibble. Where this practice is followed, great care should be taken to see that the base of the bulb is pressed firmly into the soil.

After the ground is frozen to a depth of 4 to 5 inches, it is well to put on a cover of straw or leaves. This should be removed rather early in the spring. Tulips and Hyacinths should be taken up each year. Let the foliage mature, either where they have flowered or in another location. After drying, the bulbs should be kept in a cool, dry place.

Daffodils may remain in the same place for three to four years

at a time. The clumps may then be taken up and divided for replanting.

Crocuses give a delightful effect in early spring, but, like Narcissus, should not be planted where grass is kept clipped. They are extremely desirable in naturalistic plantings, but to obtain good effects it is essential that they be used in large quantities; plan to use several thousand in each 50-foot square of woodland or meadow.

Lilies demand good drainage. This may be secured by placing a quantity of sand below each bulb, or by mixing peat or humus with the soil. The tall varieties should be planted in a location where they receive protection from high winds; all of them enjoy partial shade.

CULTURE INDOORS.—Paper-White Narcissus and the Chinese Sacred Lilies are the easiest to grow. A bowl of pebbles and water is the "garden." Hyacinths likewise present little difficulty. Place each bulb in a glass so that the base barely touches the water, and leave them in a cool, dark place until the roots develop. They may then be brought into the light, and will produce just as fine flowers as if they were grown in pots or outdoors. Start the bulbs any time between September and January; for succession of bloom bring them into the light at intervals of several weeks.

DARWIN TULIPS

SELECTED TOP-SIZED BULBS ONLY

The Cream of the Standard Varieties and Recent Introductions

Darwin Tulips are increasing in popularity every season. Colors range from white to purplish black, including shades of crimson, violet, brown, rose, etc. Very effective for planting in shrubbery or in hardy plant borders. The flowers are large, deeply cupped, and are borne on lofty stems which are ideal for cutting and vase use. Gorgeous combinations of color can be made by planting them in broad masses or long, narrow borders. To avoid striking contrasts, use tones of bronze and pale violet with the lavenders—and soft pinks and lavenders, shades which merge into each other and do not clash as violently as the usual red and yellow. If striking effects are desired, try *Bleu Aimable* in front of *City of Haarlem*, a vivid, odd, *French* combination of blue and scarlet; or an even more effective combination of some pale yellow, like *Moonlight* (a Cottage Tulip) with a deep red-purple variety, *Faust* or *Zulu*. The new pale yellows are also good with dark mahogany-red varieties like *King Harold*. Brilliant reds like *Pride of Haarlem* and *Farncombe Sanders* are best used alone, or against an

Darwin Tulips, City of Haarlem

evergreen background. Dark pinks are good with light pinks and white varieties, like the *Cottage Picotee*. Those marked with * are best for forcing.

- Afterglow.** 26 in. Possibly the sweetest color-play found in Darwins—rich deep rose laid over salmon-orange, clearer toward the edges; inside a lovely orange topaz sheen . . . \$1 25 100 \$6 50

COTTAGE or MAY-FLOWERING TULIPS

SELECTED TOP-SIZED BULBS ONLY

The largest flowers of any Tulips are found in this class, which contains many long-pointed and lily-shaped flowers. All colors imaginable are available among them, except good blues. Many have long stems and some are shorter and some gracefully drooping so that they are excellent in front of taller sorts. For cut-flowers or garden decoration. The new varieties included represent a great advance in this class.

ALASKA. 28 in. Long canary-yellow petals with butter-colored base, opening to an enormous flower of star-like shape	Doz.	100	\$1 25	\$7 50
ALBINO. 26 in. Superb ivory-white flowers on thick, sturdy stems, rated as one of the finest Tulips in this rare color. Yellow anthers	1 25	8 00		
Ambrosia. 25 in. Superb salmon-orange inside, with yellow and green patterned base; outside color subdued lilac-rose, with gay edging of luminous apricot	1 25	6 50		
Avis Kennicott. 24 in. Long chrome-yellow with black base and anthers. For bedding	1 25	6 00		
BEVERLEY. 29 in. Orange-flame flowers of flaring form and breath-taking beauty on tall, graceful stems	3 00	20 00		
CARRARA. 24 in. Pure white, no other tints. Large, rounded cups. Does well in pans for middle-March blooms	1 50	8 50		
DIDO. 28 in. In Dido the body-color is a deep coral-pink, edging into light orange; the inside is like costly silk, flaming orange with green and yellow base. Full-blown flowers are 3½ inches deep	1 25	6 50		
Grenadier. 21 in. Flaming orange; very large flower of lily-like form	1 25	6 50		
Inglescombe Pink. 25 in. Delicate rose-pink, tinted salmon; blue center. A lovely variety if grown in partial shade	1 00	5 50		
Inglescombe Yellow. 23 in. Known as the yellow Darwin Tulip. Canary-yellow. For borders and cutting . . . \$50 per 1,000	1 00	5 50		
JEANNE DESOR. 28 in. Produces a large flower of Darwin shape, carried on strong, tall stem. Its deep orange color and scarlet border are very striking	1 75	11 00		
John Ruskin. 18 in. Apricot-rose, shaded mauve, with pale yellow edge on petals	1 25	6 50		
LEDA. 30 in. One of the most beautiful pink Tulips extant—the result of a cross between Darwin and Cottage Tulips. The bright rose flowers are of Darwin shape and are produced on strong, tall, straight stems	1 25	7 50		
MARCELLINA. 24 in. Delicately beautiful flower of a rare, soft shade of apple-blossom-pink, lighter at the edges, with a big, white center	2 25	15 00		
MARJORIE BOWEN. 24 in. Soft rose with silvery brownish edge; clear yellow base	2 75	17 00		
MAYFLOWER. 24 in. Rare and lovely flowers of rich salmon-flame color becoming dazzlingly bright as it develops. A very striking novelty	4 50	32 50		
MME. BUYSENS. 29 in. Bright yellow; large flower on tall stem	4 00	30 00		
Moonlight. 24 in. Cup-shaped blooms 4 inches deep and 2 inches wide may be produced with ordinary care. The color is a lovely strong yellow with a soft yellow bloom which gives the cup that pale moonlight tint for which it is famous	1 00	5 50		
Mrs. Moon. 25 in. An especially good all-yellow of a rich deep tone. It is of unusual form, the long, flaring petals curving twice, producing a vase effect instead of a cup. Brilliant yellow inside. Good perfume. Fine stem	Doz.	100	\$1 60	\$5 50
ORANGE DELIGHT. 22 in. Huge flowers of splendid shape very conspicuous for their brilliant, glossy orange hue—a most unusual shade	3 00	20 00		
Picotée (Maiden's Blush). 24 in. Cream-white, softly pink edged, changing to a deeper pink. For cutting and bedding	1 00	5 50		
WALL STREET. 22 in. Notable for its deep, glowing yellow flowers and stoeky stems. Extra fine for bedding	4 00	30 00		
MAY-FLOWERING TULIPS MIXED. A well-balanced mixture of all the foregoing varieties \$45 per 1,000	75	5 00

BREEDER TULIPS

TOP-SIZED BULBS ONLY

These are the old Dutch self-colored Tulips, neglected for many years, which modern taste for unusual colors has called into prominence once more. Nature's happiest color-combinations of purple and bronze, gray and lilac, brown and orange, are revealed to us in this group. The flowers are mostly large, of perfect form, and are borne on tall, strong stems.

Bacchus. 32 in. Deep violet-blue, with darker bloom; inside light violet-blue, with white star at base	Doz.	100	\$1 25	\$6 50
Bronze Queen (Clio; Biseuit). 28 in. Buff-yellow, inside shaded golden bronze; yellow base. For borders, and a good foreer . . .	1 00	6 00		
Dom Pedro. 24 in. Deep coffee-brown, with margin of golden brown outside, the turned petal showing a yellow and olive base, with overtones of bright mahogany	1 25	7 00		
Golden Bronze. 25 in. Outside distinctly old-gold, with a shading of lavender, rising from the base nearly to the tips of the petals; inside silky brown, shading to golden bronze; lovely yellow center	1 25	7 00		

Godet Parfait. 30 in. Large flower of attractive color—dark plum-violet, with white base and blue halo	Doz.	100	\$1 25	\$7 00

MRS. BEECHER STOWE. 26 in. Clear deep blue, uniform in color. Good form and splendid stem	1 50	10 00		
--	------	-------	--	--

Panorama (Fairy). 26 in. Warm terra-cotta with reddish mahogany—a quiet, even tone which covers the huge goblets entirely. The large petals are curved in at the top, so that even on very bright days the flower appears closed	1 25	6 50		
---	------	------	--	--

Prince of Orange. 27 in. Terra-cotta with orange edge; the open petals warm orange on yellow base, figured with black arrows. Cups elongated, filled with abundant perfume	1 25	6 50		
---	------	------	--	--

Velvet King. 26 in. Strong violet-purple of a nice, even tone; inside much brighter; base passing from blue into white	1 25	6 50		
---	------	------	--	--

VIRGILIUS. 26 in. Dull blue-purple, goblet-shaped flower with a silvery overlay brightly edged with fiery purple; striking blue base edged with silvery white	1 50	9 00

BOTANICAL TULIPS

Plant in generous clumps in good soil, preferably at the base of a fairly large sheltering rock, which will serve both as protection and as a background when they are in flower.

Clusiana. 12 in. Carmine-rose, with white edge. It is sometimes known as the "Candy-stick" Tulip because of its delicately red-and-white striped effect when partly open	Doz.	100	\$1 25	\$6 50
---	------	-----	--------	--------

Cornuta stenopetala. 10 in. Crimson, with points of petals rich yellow	2 00	14 50

PARROT TULIPS

Very large varieties with drooping, parrot-like buds and wide-spreading, fringed and frilled petals with curious markings. Unusual and striking as cut-flowers but not good for bedding or mass display.

FANTASY. This striking variety has the silken texture of its ancestor, Clara Butt, with the same ashy salmon-pink on the outer surface, splashed and blended with a greenish shade, melting into pink through shades of cream, yellow, and lemon. The strong, stiff stems grow 28 to 30 inches high \$1 50 \$9 00

SPLENDID MIXTURE. All the best varieties. 75 5 00

Single Early Tulips

TOP-SIZED BULBS ONLY

The old-fashioned Single Early Tulips are unsurpassed for bedding and, with few exceptions, excellent for forcing. Gardeners are learning that the wholesale discarding of this class, which took place a few years back, was a mistake. The monotony of the solid beds of red and yellow, and the acres of Keizerskroon which used to make our parks and gardens offensive, will never return, but such lovely things as De Wet, Lady Boreel, Pink Beauty, Royal Crimson, and Rose Luisante are indispensable in any well-planned garden. Blooming with the narcissus, at a time when bright color is sorely needed, they are treasures indeed. And the handsome thing about them is that they are gone by the time the space is needed for annuals and bedding plants, so that there is no blank interval in the effective use of the ground.

APRICOT YELLOW. 14 in. A salmon-orange sport of White Hawk. Doz. 100
Beautiful variety \$1 25 \$7 50

BELLE ALLIANCE (Waterloo). 15 in. Blazing cherry-red, with a dazzling yellow center. Good for forcing and bedding 1 00 6 00

CARDINAL RAMPOLLO. 14 in. Bright orange, suffused and edged with yellow. A gay bedding variety, and very useful for inside for Easter 1 25 7 50

Fred Moore. 15 in. Apricot-brown, shaded at edges of petals to dull orange-yellow. Early forcing 75 5 00

GENERAL DE WET. 18 in. Golden yellow, flushed and veined deep orange, intensifying as the flowers expand to flaming orange-red. The stems are almost sixteen inches tall, and the sweetly scented blooms are larger than any but the finest new Cottage varieties \$1 00 \$5 50

JONKOPING. 14 in. Deep orange-red. Splendid for early forcing 1 25 7 50

KEIZERSKROON (Grand Duc). 16 in. Bright crimson-scarlet, edged golden yellow. For bedding and forcing 1 25 7 00

LADY BOREEL. 11 in. Snow-white, large, long flower. Best white for beds. 1 25 6 50

Mon Tresor. 12 in. Pure yellow. The best yellow Tulip for early forcing 1 25 6 50

PINK BEAUTY. 13 in. Brilliant scarlet-pink, outer petals bordered with the same color. The base of the flower is white, with an intense yellow center and orange-yellow anthers. Strongly recommended for both bedding and forcing 1 25 6 50

Prince of Austria. 14 in. Fine orange-red; sweet-scented 75 5 00

Proserpine. 14 in. Claret-red. The earliest variety for forcing; excellent for bedding 1 00 5 50

RISING SUN. 16 in. Deep golden yellow. Excellent bedder 1 00 5 50

Rose Luisante. 14 in. Brilliant deep rose-pink. Superb for bedding or late forcing 1 00 6 00

ROYAL CRIMSON. 16 in. Satiny earmine; large and tall. Splendid for bedding and mid-season forcing 1 00 6 00

SUNBURST. 15 in. Golden yellow, flushed and flamed with red. A new color combination in Single Early Tulips 1 50 9 00

Vermillon Brilliant. 13 in. Vermilion-red. Good for forcing 1 00 5 50

WHITE BEAUTY (Albion). 13 in. An improved form of La Reine. Pure white. Extra early 1 50 9 50

DOUBLE EARLY TULIPS

Very showy and lasting; splendid for beds and borders and for culture in pots. Double Early Tulips have been much maligned but for long-lasting color early in the season, nothing is better, and some of the best have really lovely form.

HYACINTHS

FOR GARDEN AND HOME

Hyacinths may be put to several uses: They may be grown in beds and borders, forced in pots or pans, or grown in water, and are very easy of cultivation. They possess a wonderful perfume, and there are many shades ranging through Pure White, Pale Blue, Lavender, Mauve, Purple, Red, Pink, Blush-White, and Yellow. Suitable alike for the amateur and professional grower.

WILLIAM M. HUNT & CO., Inc., NEW YORK

EARLY ROMAN HYACINTHS

The early Roman Hyacinth, with its graceful spike of fragrant bells, is one of the earliest of all winter-flowering bulbs.

New-crop bulbs will be ready in September, when they may be planted in pots or pans of a compost containing two-thirds fibrous loam and one-third sand. They may also be placed in the more artistic ornamental bowls now available in any china store, using our prepared Bulb Fibre as a filler, which only needs to be kept continually moist, requires no additional fertilizer, and in which the bulbs thrive and bloom luxuriantly. Bulbs planted in September bloom in December.

PREPARED DUTCH HYACINTHS

These bulbs are intended only for indoor planting and have, both in growing and harvesting, been submitted to a treatment that insures early ripening and leaves them in a condition to respond to intense forcing methods for early bloom. Planted in September, they bloom about the same time as the Roman Hyacinths, or soon after them.

Bulb Fibre. A natural peat fibre, full of nutritious properties for the growing of flower bulbs indoors. This compost acts as a moisture-retainer, which promotes the growth of roots on the bulbs, at the same time releasing its organic fertilizing elements in soluble form, developing and maintaining a steady and sturdy growth on the bulbs until the flowers have matured. **Peck \$1.50; bushel \$5.50.**

Miscellaneous Bulbs for Spring Flowering

AMARYLLIS

Vittata Hybrids. This selection contains a mixture of the finest unnamed seedlings in cultivation. The colorings and markings are unique and provide a show of unexampled beauty. Extra-large, sound bulbs of enormous size. \$1.50 each; \$15 per doz.

ANEMONE

Gorgeous, whirled flowers of brilliant colors—scarlet, blue, pink, white, etc.—with strongly contrasted centers. They are splendid cut-flowers and make a fine showy bed. In most sections the bulbs need about the same protection afforded pansies. They can be kept in a frame over winter and be moved into the garden when in bud or bloom.

Blue Poppy. Very large variety containing many shades of blue. \$1 per doz.; \$7 per 100; \$65 per 1,000.

French, Single Mixed. 75 cts. per doz.; \$5.50 per 100; \$50 per 1,000.

St. Brigid, Mixed, Irish Strain. \$1 per doz.; \$6.50 per 100; \$60 per 1,000.

CHIONODOXA

Lovely blue and lavender flowers much like scillas, except that the flowers are held erect, and are useful for the same purposes.

Luciliae (Glory-of-the-Snow). Blue with white center. 40 cts. per doz.; \$1.75 per 100; \$15 per 1,000.

Sardensis. Intense bright blue. 50 cts. per doz.; \$2.25 per 100; \$20 per 1,000.

CYPRIPEDIUM

Native Orchids or Lady-slippers

These hardy plants require acid soil and partial shade. The delicate blooms have a large, pouched petal or "lip," forming the "slipper," with curiously curled standards or waved perianth of petals and sepals behind it, usually of contrasting colors.

Acaule. Broad leaves, with a single stem between them, bearing a large pink flower. Strong acid soil, a somewhat dry situation, and plenty of shade. One of the loveliest. 3 to 4 crowns. \$4 per doz.; \$25 per 100.

Pubescens (Yellow Lady-slipper). Erect, leafy stems bearing several yellow-pouched flowers of great charm, daintily spotted with brown. Acid soil, moist ground, and shade. 3 to 4 crowns. \$5 per doz.; \$30 per 100.

Spectabile (The Queen's Orchid). Similar to Pubescens in habit, with larger flowers. Pouch rose-red or white, stained rose. The handsomest native Orchid. 3 to 4 crowns. \$6 per doz.; \$40 per 100.

DIELYTRA (Dicentra)

Spectabilis (Bleeding-Heart). Not a bulb, but strong roots which produce lovely foliage and long racemes of pink, heart-shaped flowers in May. Especially valuable for shady places and for forcing. \$6 per doz.; \$40 per 100.

EREMURUS

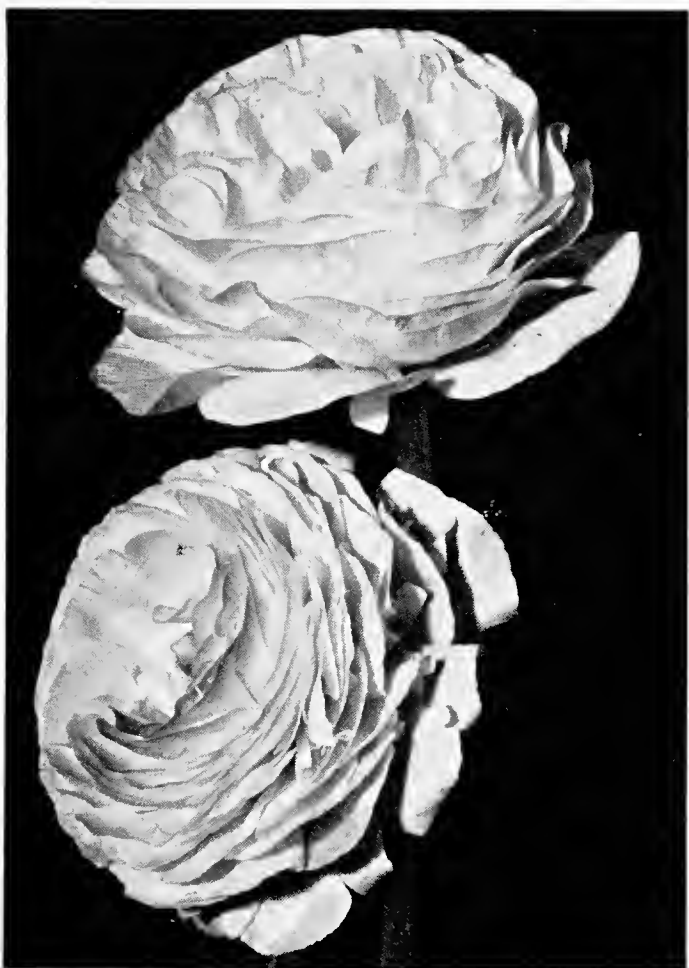

Extremely rare plants of liliaceous habit, throwing up lofty stems bearing tremendous spikes of lily-like flowers. The fleshy, spider-like roots should be planted in a sheltered place, because the new growth is susceptible to damage by late spring frost and ought to be left undisturbed, as they improve with age.

Pre-cooled Bulbs for Christmas-flowering

This stock is dug as usual, cured for two to three weeks, graded and then placed in a temperature of 50° Fahr. from six to eight weeks. Storage at this temperature makes normally late-flowering varieties **early** and early sorts **much earlier** and **easier to force**; in fact, they require only six to eight weeks from planting to full bloom.

Pre-cooled Bulbs should be potted promptly on receipt and kept in a cool place for proper root-action. On or about November 25, sample pots or flats should be removed to greenhouse or frames to see if they are ready to grow buds and foliage.

We offer Extra-Quality Pre-cooled Bulbs as follows, and suggest early ordering:

HARDY GARDEN LILIES FOR FALL AND SPRING PLANTING

Hardy Lilies are among the most gorgeous subjects for the garden that can be planted. When happily placed they throw up sturdy stems in an eager desire to unfold their wonderful flowers above the heads of their companions, holding the admiring gaze of all who pass.

All Lilies do not like the same conditions. The one universal requirement for all is absolutely perfect drainage. The loose, scaly bulbs which Lilies produce are susceptible to rot in wet soil, and it will pay to go to some pains to be sure that the ground for them is properly drained. When Lilies are well established in the garden, it is well to feed them with a top-dressing of manure after the tops have died down in the autumn. It is better to omit manure from the Lily-bed before planting.

Auratum (The Golden-banded Lily of Japan). One of the stateliest of all the hardy Lilies; grows 3 to 6 feet high and bears twenty or more large and fragrant flowers 8 to 10 inches in diameter. Planted in clumps of six or so, they make an attractive sight. Flowers white, spotted deep red, with bright yellow band running through the center of each petal, in August. Doz. 100

Mammoth Bulbs \$8 00 \$60 00

Extra-large Bulbs 6 00 45 00

Candidum (Madonna or Annunciation Lily). The bulbs we offer are the true, hardy, Northern French-grown; arriving here in September, they should be planted at once, in groups of from 3 to 6 dotted among the taller-growing perennials. They make their leaf-growth in October, then die down and bloom late the following June—stately spikes of large, white, fragrant flowers with yellow anthers. Doz. 100

Specially Selected Top-size Bulbs. XXX. \$8 50 \$65 00

Mammoth Bulbs. XX 7 00 50 00

Batemanniae. Beautiful Japanese variety, growing 3 feet high, with six to eight apricot-colored flowers held erect on a stem. Blooms in July and August 6 00 45 00

Canadense (Meadow Lily). A stout-stemmed Lily with whorled leaves, bearing a spreading, loose panicle of drooping, bell-shaped flowers, usually orange or scarlet spotted with brown and maroon. 2 to 5 feet high. Flowers in June and July 3 50 24 00

Croceum. A strong-stemmed Lily bearing Doz. 100 erect flowers in a pyramidal cluster in June and July. The blooms are yellow and orange, spotted red, and very freely produced. 3 to 4 ft. \$7 00 \$50 00

Henryi (Yellow Speciosum). 4 to 5 ft. In form and habit resembles *L. speciosum*. Flowers shaded yellow, slightly varying in color, with a distinct and waxy green center. Blooms during August and September . . . 9 00 65 00

Philippinense formosanum. The new white hardy Lily, of which it is predicted that it will outshine *L. regale* in usefulness and beauty. The very fragrant trumpet flowers resemble an Easter Lily 4 50 35 00

Regale. 3 to 4 ft. The finest and most easily grown is this Lily, producing large, flared trumpets suffused with gold and yellow on the inside and slightly stained with purple on the backs of the outer petals. The stem is stout and very wiry, so that the plant takes up very little room after flowering. It blooms immediately after the Madonna Lily and is one of the finest plants to be found in gardens.

IRIS (Fleur-de-Lis)

DUTCH or HOLLAND IRIS

Iris Tingitana and Spanish Iris may be grown both in and outdoors. If planted indoors they should not be forced, or they will be apt to come blind; given a slow treatment they will bloom without difficulty in the early spring.

Blue Horizon. Purple-blue standards and soft sky-blue falls. \$1 per doz.; \$6 per 100.

David Bless. A very early blue. \$1.50 per doz.; \$10 per 100.

Heemskerk. Earliest Dutch Iris and finest yellow. Very large flower. \$1.25 per doz.; \$7.50 per 100.

GRASS SEED MIXTURES

Hunt's Perfection Lawn Seed

This mixture is well worthy the name we have bestowed upon it, and we firmly believe it has become the favorite Grass Seed for use where a fine lawn is of importance. Those who have tried out this seed tell us that "we have got the real goods for a perfect lawn." Lb. 80 cts.; 20 lbs. \$14; 100 lbs. \$65.

Hunt's Perfection Lawn Seed contains 10 per cent South German Mixed Bent.

Prospect Park Lawn Seed

With proper care of the soil before sowing it will produce a rich, velvety lawn in six to eight weeks, which will remain green throughout the year. For making new lawns we recommend 5 bushels to the acre; 1 pound of seed will sow 250 square feet; for renovating use one-half this quantity. Lb. 65 cts.; 20 lbs. \$11; 100 lbs. \$50.

MIXTURE FOR SHADY LAWNS AND UNDER TREES.

It quickly produces an abundant and even growth of lovely green grass where ordinary lawn seed mixtures fail. Lb. 75 cts.; 20 lbs. (bus.) \$12.50; 100 lbs. \$60.

TERRACE LAWN SEED. A mixture of fine stoloniferous grasses specially suited to terraces. Will produce a rich and lasting turf. Sow at the rate of 2 pounds per 100 square feet. Lb. 65 cts.; 20 lbs. \$11; 100 lbs. \$50.

TENNIS-COURT MIXTURE. Will make a firm, green and lasting turf in the shortest possible time. Lb. \$1; 20 lbs. \$17.50; 100 lbs. \$80.

SEASHORE MIXTURE. This mixture is peculiarly suited to seaside lawns, etc. Lb. 75 cts.; 20 lbs. \$12.50; 100 lbs. \$60.

POLO FIELD MIXTURE. A mixture of specially selected grasses for heavy trampling that will quickly recover from hard usage. 100 lbs. \$55; 500 lbs. \$250.

HUNT'S LAWN DRESSING SEED

Unsurpassed for Restoring Old Lawns

Our **Lawn Dressing Seed** is a scientific blending of the **Finest Lawn Seeds** with those fertilizing elements that give nourishment to the rootlets, thus insuring perfect growth, fine texture, and deep, rich coloring. Germination and rapid growth are stimulated by its free use. 5-lb. bag \$3; 25-lb. bag \$11; 50-lb. bag \$20; 100-lb. bag \$38.

Pot-Grown Strawberry Plants

Late summer planting of Hunt's Superb Strawberry plants in heavily fertilized ground insures a good crop of fruit next spring

Strawberries give the greatest yield and the largest berries when grown in rich soil; hence, no pains should be spared in preparing the bed carefully before planting, by digging or plowing deeply and turning under a liberal supply of well-rotted manure. At fruiting-time a top-dressing of ground bone will be beneficial.

Strawberry plants should be set out in rows 2 feet apart and the plants a foot apart, cutting off all runners as they appear. The varieties we offer are all perfect flowering and therefore need no association with any other variety for perfect fruiting.

Shipping season lasts from July 15 until October. We recommend as early planting as possible to enable the plants to get established before the advent of winter.

Uniform prices for all sorts (except where otherwise quoted), \$1.25 per doz.; \$7 per 100

POPULAR STANDARD VARIETIES

Chesapeake. The berries are uniform in size and shape, mostly heart-shaped. Color is bright crimson and the flesh firm and of excellent quality. Midseason to late.

Dorsett. A recent introduction which is destined to lead as an early berry. Large, firm, and of perfect quality, these bright red berries will captivate your berry appetite. \$1.50 per doz.; \$9 per 100.

Early Jersey Giant. Fruit of extra-high quality, very attractive, and extremely productive.

Fairfax. Another very recent introduction, and one which cannot help assuming the leadership of the home garden as a second-early berry. Its flavor is even richer than that of Dorsett, and the berries are slightly larger and very firm. \$1.50 per doz.; \$9 per 100.

Howard No. 17. One of the best of the second-early varieties.

Joe (Big Joe). A midseason to late variety, fully up to Chesapeake in size, firmness, and yield.

Lupton. Very much like Gandy but much more productive and about five or six days earlier. We consider this one of the finest of the varieties fruiting late.

Marshall. Vigorous in growth, with clean, healthy foliage. Very productive under high culture. Midseason.

New Washington. Popular late sort. Very prolific, with firm, delicious fruits.

Premier. Excelled by no early variety. Produces vast quantities of berries of good size; attractive, and excellent quality.

Sharpless. A variety that fruits rather late in the season. Produces handsome, large berries of fine quality.

Success. One of the best early varieties. Bright scarlet, slightly oblong berries with blunt end.

William Belt. Another old favorite. Very productive of large, irregular berries, unsurpassed in flavor by any other variety. Midseason to late.

EVERBEARING STRAWBERRIES

The Everbearing varieties of Strawberries, frequently termed "Fall-bearing," have decided merit. In addition to bearing a good crop in late summer and autumn, they also give a heavy crop of fruit as early as June. In order to be sure of a good fall crop, remove all blossoms from the plant as they appear from the first to the middle of July.

Empire All Red. Combines the excellent flavor and sweetness of Progressive with the large size and productivity of Mastodon. Bears fruit throughout the summer and fall same year as planted. Berry is oval, with firm flesh—an all red fruit. Since this variety originated in Canada, it is extremely hardy. \$2 per doz.; \$12 per 100.

The Gem. The new Everbearing sensation, producing an abundance of bright, sparkling red berries, uniformly large in size. They are solid red to the center, juicy, deliciously sweet, and very free from acid. Does well on all types of soil. \$2 per doz.; \$12 per 100.

Mastodon. "The Wonderberry." This is truly the largest, most delicious, and heaviest yielding of all Everbearing sorts. It outyields some of the finest June-bearing varieties during their season and continues to produce throughout the summer and fall berries of amazing size and surpassingly fine quality. \$1.50 per doz.; \$10 per 100.

Progressive. The berries are smooth and uniform in size, deep crimson in color, and of superb quality. \$1.50 per doz.; \$9 per 100.
